**Active Ingredient:**
- NA - Methyl Esters of Fatty Acids
- NA - Alcohol ethoxylate
- NA - Lecithin
- 100 - Total Principal Functioning Agents

**Application Methods:**
- Air, Ground

**Label Version:** H0715

**Physical State:** Liquid (8.3 lb / ga)

**Mode of Action:**

**Product Type:**
- Adjuvant, Antifoaming Agent, Deposition Aid Agent, Drift Control Aid Agent

**Rainfastness:**

**Formulation Type:** Solution

## ADDITIONAL INFORMATION

**Federally Restricted:**

**Organic Certifications:** None

**Other Certifications:** None

**Posting Required:**
- Closed Mixing System Required: All applications in All States/Provinces: Not required

**Oral Notification Required:** Avoid Grazing: Not Applicable

## CALIFORNIA

**Registration #: 34704-50050-AA**

**CA Restricted:**

**CA NOI Required:**

GENERAL NOTICE 1

GENERAL: COMPADRE(R) is a non-ionic, non-foaming, and shear tolerant drift control agent containing suspended antifoam-defoamer. COMPADRE may be used as a drift control adjuvant to enhance deposition, retention, and control spray droplet size of agricultural and industrial chemicals. COMPADRE improves deposition by increasing initial adhesion of droplets to the surface of hard to wet plants (reducing bounce and run-off). COMPADRE will not increase viscosity of spray solution, reduce the flow rate or affect the angle of the spray nozzle. COMPADRE retards drift by producing a more uniform droplet size and a more uniform spray pattern. The degree of drift hazard varies with the type of pesticide and application conditions. Common sense and sound application technology must be followed when spraying pesticides. COMPADRE will retard, but not eliminate drift. COMPADRE is compatible with most pesticide formulations including water-soluble, flowable, wettable powders and formulations containing boron. Application may be by ground or air. DIRECTIONS FOR USE: COMPADRE may be used on and has demonstrated excellent plant safety on a wide variety of crops including fruits, tree fruits, vegetables, row crops, citrus, small grains, forage crops, vine crops and others. COMPADRE may be used in a variety of non-crop sites including Forestry (site preparation and release), Industrial (storage areas, plant sites, and other similar areas including governmental and private lands), Grasslands (including pastures, rangeland and fence rows), Rights-of-ways (utility, railroad and roadsides), Turf (golf courses, parks and sod farms), Ornamentals (container, field or greenhouse) and other turf, ornamental and landscaping sites. GENERAL USE: The antifoamer-defoamer is suspended in COMPADRE and may separate during storage but is easily re-suspended by shaking. COMPADRE should be added to the spray tank before adding pesticides to prevent foaming. Drift Reduction: One (1) pint per 100 gallons of spray mixture. 1 fluid ounce per 5 gallons of spray mixture. Note: This product has demonstrated excellent plant safety; however, not all species and varieties of plants have been tested. Before treating a large area, test on a small area and observe prior to full-scale application.

GENERAL NOTICE 2

Hazard and Precautionary Statements: May be harmful if swallowed, or in contact with skin. Harmful if inhaled. Causes skin irritation. Wash hands thoroughly after handling. May cause an allergic skin reaction. Avoid breathing dust / fume / gas / mist / vapours / spray. Use only outdoors or in a well-ventilated area. Contaminated work clothing should not be allowed out of the workplace. Environmental Precautions: Prevent further leakage or spillage if safe to do so. Do not contaminate water. Do not allow to enter drains, sewers, or watercourses.

TANK MIX INFORMATION

COMPADRE is compatible with most pesticide formulations including water-soluble, flowable, wettable powders and formulations containing boron. COMPADRE should be added to the spray tank before adding pesticides to prevent foaming.
