TOXIC TO FISH, MAMMALS, AND AQUATIC ORGANISMS FOR RETAIL SALE TO AND USE ONLY BY CERTIFIED APPLICATORS OR PERSONS UNDER THEIR DIRECT SUPERVISION AND ONLY FOR THOSE USES COVERED BY THE CERTIFIED APPLICATOR'S CERTIFICATION.

ABAMECTIN GROUP 6 INSECTICIDE

For distribution and use only within the state of IDAHO

FIFRA 24(c) Special Local Need Label (SLN)

FOR ALFALFA GROWN FOR SEED/SPIDER MITES

AbbA Ultra Miticide/Insecticide

EPA REG. NO. 5481-621

EPA SLN NO. ID-180004

KEEP OUT OF REACH OF CHILDREN WARNING/AVISO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail).

This label expires and must not be distributed or used in accordance with this SLN registration after 12/31/2027

APPLICATORS AND OTHER HANDLERS MUST WEAR:

- Long-sleeved shirt and long pants
- Socks and shoes
- Chemical-resistant gloves made of barrier laminate or butyl rubber ≥ 14 mils
- For overhead exposure wear chemical resistant headgear

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and wildlife. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift from target areas. Do not contaminate water when disposing of equipment wash water or rinsate. Use of this product may pose a risk to threatened and endangered species of fish, amphibians, crustaceans (including fresh water shrimp), and insects.

This product may impact surface water quality due to runoff of rainwater. This is especially true for poorly draining soils and soils with shallow ground water. This product is classified as having a medium potential for reaching both surface water and aquatic sediment via runoff for several weeks to months after application. A level, well-maintained vegetative buffer strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential loading of abamectin from runoff water and sediment. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This Section 24(c) supplemental label and the federal Section 3 label must be in the possession of the user at the time of application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the federal Section 3 label.

Apply ABBA Ultra to alfalfa grown for seed when spider mites first appear. Do not apply a second application within 21 days of the last treatment and only after an alternative miticide with a different mode of action has been used.

Ground Application: Apply 4-8 fl oz/A of AbbA Ultra by ground application in a minimum of 20 gallons of water per acre.

Aerial Application: Apply 6-8 fl oz/A of AbbA Ultra by aerial application in a minimum of 10 gallons of water per acre.

Restrictions/Precautions:

- Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.
- Do not apply more than 2 applications of AbbA Ultra or any other foliar applied product containing abamectin per cropping season.
- Do not apply more than 8 fl oz/A (0.019 lb ai/A) of AbbA Ultra or any other foliar applied product containing abamectin per application.
- Do not apply more than 16 fl oz/A (0.038 lb ai/A) of AbbA Ultra or any other foliar applied product containing abamectin per cropping season.
- For use under this SLN label do not apply this product through any type of irrigation system.
- All alfalfa seed screenings shall be disposed of in such a way that they cannot be distributed or used for food
 or feed. The seed conditioner shall keep records of screening disposal for three years from the date of the
 disposal. Disposal records shall consist of documentation of on-farm disposal, disposal at a controlled
 dumpsite, incinerator, composter or other equivalent disposal site and shall include the lot numbers, amount of
 material disposed of, the grower(s), and the date of disposal.
- No portion of the alfalfa seed plant, including but not limited to green chop, hay, pellets, meal, whole seed, cracked seed, roots, bulbs, leaves and seed screenings may be used or distributed for food or feed purposes.
- Alfalfa seed shall bear a tag or container label which forbids use of the seed for human consumption or animal feed.
- Alfalfa seed may not be distributed for human consumption or animal feed.
- This pesticide is toxic to fish and wildlife. AbbA Ultra should not be used under this SLN label where impact on listed threatened or endangered species is likely. Consult the federal label for additional restrictions and precautions to protect aquatic organisms.
- Apply ABBA Ultra only when wind velocity favors on target product deposition (approximately 3 to 10 mph).
- Do not apply with ground application equipment within 25 ft of or with aircraft within 150 ft of lakes, reservoirs, rivers, permanent streams, marshes, pot holes, natural ponds, estuaries, or commercial fish farm ponds.
- Do not cultivate within 25 ft. of the aquatic area to allow growth of a vegetative filter strip.

Precautions for Bees: This product is toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area. Apply in the evening after bees have stopped foraging or in early morning before bees begin foraging.
