FOR DISTRIBUTION AND USE ONLY WITHIN HAWAII

Dibrom[®] 8 Emulsive

EPA Reg. No. 5481-479

EPA SLN No. HI-180003

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Site of Application: Non-crop use: For use on fruit fly breeding areas in or on windbreaks, trap crops, buffer or border vegetation adjacent to or around areas planted with crops and vegetative strips planted between rows of crops that are attractive to fruit flies.

Target Pest/Problem: Multiple species of tephritid fruit flies.

Adjust application rate and intervals depending on pest pressure.

Dosage: Apply 1 – 2 pints of Dibrom[®] 8 Emulsive per acre of windbreak, border vegetation or vegetative strip.

Mixing Directions: Dilute 1 pint of Dibrom[®] in 15-30 gallons of water and mix with fruit fly attractant, such as Nu-Lure[®].

Frequency/Timing of Application: Apply multiple treatments as needed at intervals not less than one (1) application per seven (7) days. Do not apply a total of more than 10 pints of Dibrom[®] 8 Emulsive per acre per crop growing cycle.

Other Restrictions and Requirements:

Do not apply or allow drift to non-target areas or to any crops being grown for food or feed.

Other Restrictions and Requirements (*continued*):

Methyl eugenol is known to attract native flies of the family Drosophilidae. Other attractants may also be attractive to these native species. Therefore, do not apply within ½ mile of native or mixed native forested areas without first consulting with the Hawaii Department of Land and Natural Resources, Division of Forestry and Wildlife office for guidance.

To minimize hazard to bees, avoid applying more than two hours after sunrise or two hours before sunset, limiting application to times when bees are least active.

All applicable directions, restrictions, and precautions on the USEPA-registered label for DIBROM 8 Emulsive (EPA Reg. No. 5481-479) and this label must be followed.

This labeling must be in the possession of the user at the time of pesticide application.

Neither the Hawaii Department of Agriculture, the manufacturer or formulator makes any warranty of merchantability, fitness of purpose, or otherwise, expressed or implied, concerning the use of a pesticide in accordance with these provisions. The user and/or grower acknowledge the preceding disclaimer and accept liability for any possible damage resulting from this use. Do not mix with other pesticides, except fruit fly attractants as directed in "Mixing Directions," above.

This 24(c) registration is valid until October 14, 2028 or until otherwise withdrawn, cancelled or suspended by the United States Environmental Protection Agency (USEPA), the manufacturer, the 24(c) registrant or the Hawaii Department of Agriculture.
