### GENERAL INFORMATION

**ProFoam** is a liquid antifoam that contains 10% active silicone for the prevention of foam in fertilizer and pesticide spray applications. By providing distinctive insolubility, dispersibility, and spreadability properties, **ProFoam** reduces pesticide spillage and tank mix fill time by effectively preventing foam formation. **ProFoam** can be introduced through induction systems or through the mix tank lid opening. **ProFoam** will not interact with any of the chemicals to which it is applied.

**ENVIRONMENTAL HAZARDS:** Do not contaminate water when cleaning equipment or disposing of equipment wash waters. Approved for Aquatic Use with Pesticides Labeled for Aquatic Use.

### DIRECTIONS FOR USE

Use rates will vary depending on temperature, viscosity, agitation and composition of the spray mixture. Generally, add 1-2 ounces of **ProFoam** per 100 gallons of spray solution. For best results, **ProFoam** should be added to the tank mix prior to the addition of fertilizers or pesticides. If foaming develops during mixing, add **ProFoam** until desired foam control is obtained.
