Restrictions <ul style="list-style-type: none"> • DO NOT apply more than 32 fl oz/A (0.242 lb ai/A) per application. • DO NOT make more than 4 applications per acre per year. • DO NOT apply more than 64 fl oz/A (0.484 lb ai/A) per year.

⁽¹⁾ See annual and perennial grass control tables for specific use rates.

⁽²⁾ Non-ionic surfactant (NIS) in this case refers to an adjuvant containing at least 80% non-ionic surfactant. Crop oil concentrate in this case refers to both crop oil concentrate and crop oil concentrate blends. Acceptable crop oil concentrates would be those that contain a minimum of 80% oils and 15% emulsifier. Acceptable crop oil concentrate blends would be those that contain a minimum of 60% oils and 25-40% surfactants and emulsifiers. A crop oil concentrate must contain either a petroleum or vegetable oil base and must meet all the following criteria: be non-phytotoxic, contain only EPA-exempt ingredients, provide good mixing quality and be successful in local experience. Highly refined vegetable oils have proven more satisfactory than unrefined vegetable oils.

Use spray grade ammonium sulfate. The use of ammonium sulfate does not take the place of the required adjuvant.
